Landscape Bandana® Yellow Lantana

Lantana camara 'Landscape Bandana Yellow'

Height: 18 inches

Spread: 3 feet

Spacing: 15 inches

Sunlight: ○ ◐

Hardiness Zone: 8b

Group/Class: Bandana Series

Description:

An excellent trailing selection that can perform in tough conditions; heat and drought tolerant; beautiful flower clusters sit on top of dark green, fragrant foliage; little or no need for deadheading; perfect for garden beds and assorted containers

Ornamental Features

Landscape Bandana Yellow Lantana features showy cymes of yellow flowers with buttery yellow overtones at the ends of the branches from early summer to mid fall. It has dark green evergreen foliage. The fuzzy pointy leaves remain dark green throughout the winter.

Landscape Attributes

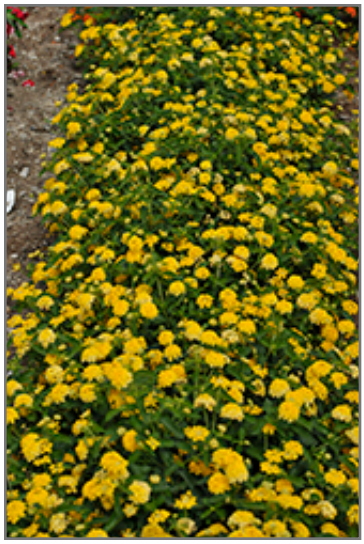

Landscape Bandana Yellow Lantana is a multi-stemmed evergreen shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Landscape Bandana Yellow Lantana is recommended for the following landscape applications;

Planting & Growing

Landscape Bandana Yellow Lantana will grow to be about 18 inches tall at maturity, with a spread of 3 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 15 inches apart. It has a low canopy. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Landscape Bandana Yellow Lantana makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor containers and hanging baskets. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
