Celebrity Rose

Rosa 'Celebrity'

Height: 5 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4a

Group/Class: Hybrid Tea Rose

Description:

These romantic, deep yellow, fully double roses with peach tips, are produced in flushes all summer; highly fragrant with a fruity scent; a vigorous plant, but compact in size; excellent for cut flowers

Ornamental Features

Celebrity Rose features showy fragrant fully double yellow flowers with peach edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges light green in spring. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

Celebrity Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Celebrity Rose is recommended for the following landscape applications;

Planting & Growing

Celebrity Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
