Height: 7 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 9a

Other Names: Parlor Maple

Description:

This variety produces stunning, bell-shaped orange blooms year round, with the largest flush in spring through summer; an erect, bushy shrub that may be shaped into a small tree; a lovely indoor accent plant for a bright area

Features & Attributes

Orange Glow Flowering Maple features showy orange bell-shaped flowers with chartreuse eyes and buttery yellow calyces at the ends of the branches from early winter to late fall. Its serrated lobed leaves emerge light green, turning forest green in color with distinctive buttery yellow spots throughout the year.

This is a multi-stemmed evergreen houseplant with an upright spreading habit of growth. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Orange Glow Flowering Maple can be expected to grow to be about 7 feet tall at maturity, with a spread of 4 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
